

# Voucher Report for the 2008 North American Mycological Association Foray

---

THE 49TH ANNUAL North American Mycological Association foray, honoring Dr. Orson K. Miller, Jr., was held at Camp Pinewood, McCall, Idaho, on September 3–7, 2008, hosted by the Southern Idaho Mycological Association (SIMA). Idaho has seen five previous NAMA forays: four were up north at Priest Lake (1966, 1968, 1972, 1986), and one was just south of McCall at Donnelly in 1976. Participants explored many sites around McCall in the Payette National Forest. There was one trip to Boise National Forest, and a few to other locales. Site elevations ranged from 4000 to 6400 feet. The rugged glacier-carved mountains are part of the Idaho Batholith, the largest granitic body of rock in the United States. Basalt lava flows are found in the western portion. Habitats were mixed conifer forests of lodgepole pine, ponderosa pine, Douglas-fir, grand fir, and western larch, with aspen at some sites, and with Englemann spruce and subalpine fir at higher elevations.

The resulting species list has 266 taxa (species, varieties, and some identified only to genus) comprised of 55 ascomycetes (38 lichens), 210 basidiomycetes, and 1 myxomycetes (slime molds). The most diverse genera were *Cortinarius* (25), *Russula* (18), and *Suillus* (10). There are 251 voucher collections preserved from the foray. Identifications were made by 23 people at the foray: Principal Mycologist Cathy L. Cripps was kindly assisted by Vera Evenson, with special thanks to Roger Rosentreter (lichens), Joshua M. Birkebak (*Cortinarius* and others), Michael W. Beug (*Ramaria* and others), Thomas J. Volk, Steven L. Miller (*Russula*), Steven A. Trudell, and the other mycologists. Several specimens were later determined by Patrick Leacock and Wyatt Gaswick at The Field Museum.

Patrick offers much multi-tasking thanks to Adele Mehta (recorder), Wyatt Gaswick (voucher assistant), NAMA sponsored graduate students

Joshua M. Birkebak, University of Washington, and Jeffrey C. Cameron, George Washington University. Also much thanks to John Plischke and Noah Siegel for help with photography, and the other volunteers who gave of their time. Special thanks to SIMA members MaryLu Anderson, Bob Chehey, Linda Fleetwood, Susan Poland, Kathy Richmond, Susan Stacy, and Genny Steiner for room setup, computer, specimen labels, supplies, and running the bus forays. Heartfelt thanks to Hope Miller for supplying Orson's library and helping with mushroom dryers and shipping specimens to the museum.

We thank the board and trustees of NAMA for their continued support of the voucher program. Thanks also go to mycology volunteer Alice Pilar and our summer interns for processing specimens in the herbarium. The NAMA 2008 specimens are accessioned into the permanent herbarium collection at the Field Museum of Natural History (F).

Submitted by Patrick Leacock, NAMA Voucher Collection Project [ [pleacock@fieldmuseum.org](mailto:pleacock@fieldmuseum.org) ]. This report and species list is posted at [www.lactarius.com/nama](http://www.lactarius.com/nama). Collection data and images of the voucher collections will be added to the NAMA Voucher Program website at [www.fieldmuseum.org/nama](http://www.fieldmuseum.org/nama). Please send additions and corrections to Patrick Leacock, [pleacock@fieldmuseum.org](mailto:pleacock@fieldmuseum.org).

The 2008 North American Mycological Association Foray was hosted by the Southern Idaho Mycological Association (SIMA) and held at Camp Pinewood, McCall, Idaho, September 3–7, 2008. Principal Mycologist was Dr. Cathy Cripps. See [www.namycology.org/events/mccall2008.html](http://www.namycology.org/events/mccall2008.html).

This species list, prepared by the Voucher Program Committee, has 266 taxa (species and varieties); 22 persons made identifications. The taxonomic arrangement follows *The Dictionary of the Fungi*, 9th ed., with some classification updates.
